Discover the new face of

Informix

New Informix Editions

Creating Growth Opportunities for Clients and Partners

New free edition to drive new solutions adoption

Informix Innovator-C Edition

- Ideal for small applications with HA
- **Free** to download, develop, and deploy
- 1 socket, 4 cores, 2GB memory
- **All platforms**
- **Requires IBM license to re-distribute**

Informix Developer Edition (existing)

- Full functionality, limited scalability
- 1 core, 1GB memory, 20 connections, 8GB DBSpace
- **Free** to download, develop, test
- **All platforms**

Greater value for purchase new editions

Informix Choice Edition

- Ideal for small to medium size business
- HA pair
- **Mac OS X and Windows**

Informix Growth Edition

- Ideal for medium size business
- Rich HA options
- Shared disk clustering
- **All Platforms**

Informix Ultimate Edition

- Full enterprise class functionality for all businesses
- Optional compression feature
- **All Platforms**

Greater values on new for purchase editions on Informix V11.50xC7

IDS Workgroup → Informix Growth Edition

- 3-nodes HA cluster of any type
 - Queries and updates on secondary nodes
 - No warm/idle standby charge
 - Full Informix license on each hot standby node, charge metric can be different from primary
- Continuous Availability Feature (aka Shared Disk Secondary (SDS)) included, up to 3 SDS nodes
 - Same charge metric on all SDS nodes
- Advanced Access Control Feature (aka LBAC) included
- Unlimited Enterprise Replication (ER) nodes, both root/admin and leafnodes
- Informix Warehouse for Workgroup Edition rolled into Growth Edition
 - SQL Warehousing Tool (formerly Informix Warehouse Feature) included
- 4 sockets processor limits for all charge metrics, no more PVU limit

IDS Enterprise → Informix Ultimate Edition

- Unlimited scaling and functionality
- Formerly for charge feature options now included
 - Continuous Availability Feature
 - Advanced Access Control Feature
- Storage Optimization Feature remains a for charge feature option
- HA cluster of any type
 - No warm/idle standby charge
 - Full Informix license on each hot standby node, charge metric can be different from primary
- Unlimited SDS nodes
 - Same charge metric on all SDS nodes
- Informix Warehouse for Enterprise Edition rolled into Ultimate Edition
 - SQL Warehousing Tool (formerly Informix Warehouse Feature) included
 - Purchase Storage Optimization Feature separately

Informix Editions Summary

July 20th

Information Management

Edition	Charge Metrics	Resource Limits	Functionality Differentiation Summary
Ultimate Linux, Unix, Mac, Win	PVU, CS, AU Single Install	unlimited	For Charge Feature - Storage Optimization Feature option Everything else included
Growth Linux, Unix, add Mac & Windows	LU Socket, PVU, CS, AU Single Install	4 sockets, max 16 cores 16GB Informix memory across all instances per Install	Features Unavailable: Compression, parallel features, partitioning Partially Available: 3-node cluster 1 primary, any 2 secondary servers (HDR, RSS, SDS) unlimited ER root & leafnodes
Choice Edition Mac & Windows only	LU Socket, AU Single Install (AUSI)	2 sockets , max 8 cores 8GB Informix memory across all instances per Install	Features Unavailable: Compression, Shared Disk Secondary (SDS), parallel features, partitioning, Advanced Access Control, Informix Warehouse Feature (aka SQL Warehousing Tool), multiple secondary servers Partially Available: 2-node cluster 1 primary, 1 secondary servers (HDR, RSS) Enterprise Replication (2 root nodes)
Innovator-C Linux, Unix, Mac, Win	Free License to develop, test, and deploy Re-distribution license required Optional support - per Install/year, renewal each year	1 socket, max 4 cores 2GB Informix memory across all instances per Install	Features Unavailable: Compression, Shared Disk Secondary (SDS), parallel features, partitioning, Advanced Access Control, Informix Warehouse Feature (aka SQL Warehousing Tool), multiple secondary servers Partially Available: 2 node cluster 1 primary, 1 secondary servers (HDR) Enterprise Replication (2 root nodes)
Express (existing) Linux, Win	LU virtual server, PVU, AU Single Install	200 PVUs 4GB Informix memory across all instances per Install	Features Unavailable: Compression, CAF, parallel features, partitioning, ER, HDR, RSS, SDS, Advanced Access Control, Informix Warehouse, all DataBlades except geospatial, time-series, and real-time loader

PID	Old Offering	New PID	New Replacement Offering
5724L23	IDS Enterprise Edition	5725A39	Informix Ultimate Edition
5724L23	IDS Storage Optimization Feature for Enterprise Edition	5725A39	No Change – Informix Storage Optimization Feature is a for-charge feature option available only on the Ultimate Edition
5724L23	IDS Continuous Availability Feature for Enterprise Edition	n/a	No replacement - feature included in Ultimate Edition, New - limited clustering availability included in Growth Edition on Linux & Unix, not included in Ultimate-C or Innovator-C
5724L23	IDS Advanced Access Control Feature for Enterprise Edition	n/a	No replacement - feature included in Ultimate Edition
5724L23	IDS Workgroup Edition	5725A40	Informix Growth Edition
5724L23	IDS Advanced Access Control Feature for Workgroup Edition	n/a	No replacement - feature included in Growth Edition
5724W92	Informix Warehouse Enterprise Edition	5725A39	Informix Ultimate Edition plus Storage Optimization Feature
5724W93	Informix Warehouse Feature for Enterprise Edition	n/a	No Replacement - feature included in Informix Ultimate Edition
5724W92	Informix Warehouse Workgroup Edition	5725A40	Informix Growth Edition
5724W93	Informix Warehouse Feature for Workgroup Edition	n/a	No Replacement - feature included in Growth Edition
5724Z04	IDS Express Edition	5724Z04	No change – Informix Express Edition

License Entitlement Migration for IBM Passport Advantage Customers

- Active IBM Passport Advantage customers have been automatically migrated to the new Informix replacement license entitlements on May 25, 2010
- In the interim, until their next S&S renewal is completed, Passport Advantage will display both the old and replacement Informix license entitlements
- Beginning on May 25, 2010, renewal quotes will be based on the new replacement part numbers.
- After the next S&S renewal is completed, only the new replacement entitlements will be displayed
- We prepared a customer letter explaining the entitlement migration and what to expect
 - The letter is available in <http://www-01.ibm.com/support/docview.wss?uid=swg21431901>
