

IBM Informix SE and OnLine trade-ups to IDS Express, XPS V8.51 release, and Gold Bundle updates

Overview

IBM announces tradeups to IBM Informix™ Dynamic Server (IDS) Express Edition V10.0 from Informix Standard Engine (Developer and Runtime), from OnLine Extended Edition (EE), and from OnLine EE for Linux™, as indicated in the table in the **Description** section.

The following Data Management Gold Bundles are being updated:

- Data Management Gold Program Business Intelligence Bundle
- Data Management Gold Program Red Brick™ Analytic Bundle for Enterprises
- Data Management Gold Program Red Brick Analytic Bundle for SMB

IBM also announces availability of Informix Extended Parallel Server (XPS) V8.51, which is designed for the largest, most demanding, and most complex data warehouse applications. By including comprehensive data warehousing features and using a sophisticated, shared-nothing, underlying architecture, XPS achieves industry-leading performance and flexibility. This enables you to make more profitable decisions from complex, query-intensive, analytical applications.

The following products are bundled with IBM Informix XPS V8.51, and can also be ordered separately for use with other servers:

- IBM Informix Connect Runtime V2.90 — This is the runtime library for the Client Software Development Kit (CSDK) V2.90. CSDK is a collection of APIs that can speed development time for applications that work with IBM Informix Dynamic Server (IDS) and XPS. The CSDK APIs are optimized for accessing Informix databases.

- IBM Informix Java™ Database Connectivity (JDBC) V3.00 — The IBM Informix JDBC driver is a pure Java platform-independent, industry-standard, type 4 JDBC driver.
- IBM Informix Server Administrator (ISA) V1.60 — IBM ISA is a browser-based, cross-platform database server administration tool.
- IBM Informix I-Spy V2.0 — A smart data warehouse monitoring and optimization tool designed for IBM Informix databases.

Refer to the **Description** section for details of the updates.

For additional information, also refer to:

- Software Announcement 204-054, dated March 30, 2004, (Data Management Gold Bundle updates for Business Intelligence and Red Brick)
- Software Announcement 204-064, dated April 13, 2004, (Red Brick V6.30 and Red Brick Gold Program Bundles)
- Software Announcement 204-166, dated July 27, 2004, (Informix XPS V8.50)
- Software Announcement 204-185, dated August 17, 2004, (DB2® Universal Database for Linux, UNIX®, and Windows™, V8.2)
- Software Announcement 204-202, dated September 14, 2004, (DB2 Information Integrator for Linux, UNIX, and Windows, V8.2)
- Software Announcement 205-105, dated April 26, 2005, (Informix Dynamic Server Express Edition V10.0)

Key prerequisites

Refer to the **Hardware requirements** and **Software requirements** sections of this document.

At a glance

- Special price trade-up from Informix SE and OnLine EE to IDS Express Edition V10.0
- Extended Parallel Server (XPS) V8.51 availability
- Data Management Gold Program Business Intelligence Bundle update
- Data Management Gold Program Red Brick Analytic Bundle for Enterprises update
- Data Management Gold Program Red Brick Analytic Bundle for Small and Medium Businesses (SMB) update

For ordering, contact:

Your IBM representative, an IBM Business Partner, or the Americas Call Centers at

800-IBM-CALL

Reference: YE001

Planned availability dates

- March 14, 2006: Electronic software delivery
- March 16, 2006: Media and documentation

This announcement is provided for your information only. For additional information, contact your IBM representative, call 800-IBM-4YOU, or visit the IBM home page at: <http://www.ibm.com>.

Description

Trade-up options to IDS Express Edition V10.0

The table below outlines the trade-up options available to IDS Express Edition V10.0. IDS Express Edition V10.0 is available in two metrics:

- Processor (IDS Express Edition Unlimited)
- Server + client (IDS Express Edition V10.0) — The server component is mandatory and contains no user entitlements. The client is licensed on an authorized user metric.

Current product	IDS Express Edition V10.x trade-up options	Trade-up requirement
D52EFLL Informix SE Developer concurrent session	D550BLL IDS Express Edition Unlimited processor Lic+SW Maint 12 Months or D5507LL IDS Express Edition Server Lic+SW Maint 12 Months or D5509LL IDS Express Edition authorized user Lic+SW Maint 12 Months	Minimum 25 concurrent sessions to one processor One concurrent session to one server One concurrent session to one authorized user

Current product	IDS Express Edition V10.x trade-up options	Trade-up requirement
D52EJLL Informix SE Runtime concurrent session	D550BLL IDS Express Edition Unlimited processor Lic+SW Maint 12 Months or D5507LL IDS Express Edition Server Lic+SW Maint 12 Months or D5509LL IDS Express Edition authorized user Lic+SW Maint 12 Months	Minimum 25 concurrent sessions to one processor One concurrent session to one server One concurrent session to one authorized user

Current product	IDS Express Edition V10.x trade-up options	Trade-up requirement
D51QLLL Informix OnLine Extended Edition concurrent session	D550BLL IDS Express Edition Unlimited processor Lic+SW Maint 12 Months or D5507LL IDS Express Edition Server Lic+SW Maint 12 Months or D5509LL IDS Express Edition authorized user Lic+SW Maint 12 Months	Minimum 25 concurrent sessions to one processor One concurrent session to one server One concurrent session to one authorized user

Current product	IDS Express Edition V10.x trade-up options	Trade-up requirement
D51ZILL Informix	D550BLL IDS Express Edition Unlimited	Minimum 25 concurrent

OnLine Extended Edition for Linux concurrent session	processor Lic+SW Maint 12 Months or D5507LL IDS Express Edition Server Lic+SW Maint 12 Months or D5509LL IDS Express Edition authorized user Lic+SW Maint 12 Months	sessions to one processor One concurrent session to one server One concurrent session to one authorized user
--	---	--

Trade-up example 1

A customer who has five SE Developer licenses and five SE Runtime licenses would like to trade-up to IDS Express and run on a two-processor server. Since the customer has a total of 10 concurrent sessions, the allowable trade-up is only to IDS Express Server+/authorized user metric.

Five SE Developer licenses trade to:

- One server license for IDS Express
- Four authorized user licenses for IDS Express

Five SE Runtime licenses trade to:

- Five authorized user licenses for IDS Express

Resulting in a total of one IDS Express Server™ license and nine authorized user licenses.

Note: IDS Express Server does not include any user authorizations.

Trade-up example 2

A customer who has 30 OnLine Extended Edition licenses would like to trade-up to IDS Express Unlimited and run on a two-processor server. Since the customer has a total of 30 concurrent sessions, the allowable trade-up is to only one IDS Express processor license. The customer must buy the second license at entitlement price.

25 OnLine Extended Edition licenses trade to:

- One processor license for IDS Express
- Must buy a new license for the second processor

Note: A minimum of 25 concurrent session licenses may be traded for an IDS Express processor license.

XPS V8.51

XPS V8.51 is designed for the largest, most demanding, and most complex data warehouse applications. By including comprehensive data warehousing features and using a sophisticated shared-nothing underlying architecture, XPS achieves industry-leading performance and flexibility. This enables you to make more profitable decisions from complex, query-intensive, analytical applications.

The following Informix products are bundled with XPS V8.51, and can also be ordered separately for use with other servers:

- Connect Runtime V2.90
- Java Database Connectivity (JDBC) V3.00
- Server Administrator (ISA) V1.60
- I-Spy V2.0

For additional information, refer to the **Technical information** section.

Updates to the Data Management Gold Bundles

The Data Management Gold Bundles are updated with this announcement as follows.

- Software Announcement 205-105, dated April 26, 2005, (Informix Dynamic Server Express Edition V10.0)

Data Management Gold Bundle	Gold Bundle component	Component replacement
Gold Business Intelligence Bundle	Informix Extended Parallel Server (XPS) V8.4 DB2 UDB Enterprise Server Edition V8.1 Database Partitioning Feature V8.1 DB2 Universal Developer's Edition V8.1 (five users)	Informix Extended Parallel Server (XPS) V8.51 DB2 UDB Enterprise Server Edition V8.2 Database Partitioning Feature V8.2 DB2 Universal Developer's Edition V8.2 (five users)
Gold Red Brick Analytic Bundle for Enterprise	Red Brick Warehouse Server Enterprise Edition V6.3 DB2 Information Integrator Standard Edition V8.1 DB2 UDB Enterprise Server Edition V8.1 DB2 Universal Developer's Edition V8.1 (up to five users)	Updated to current maintenance level WebSphere® Information Integrator Standard Edition V8.2 DB2 UDB Enterprise Server Edition V8.2 DB2 Universal Developer's Edition V8.2 (up to five users)
Gold Red Brick Analytic Bundle for SMB	Red Brick Warehouse Server Workgroup Edition V6.3 DB2 Workgroup Server Unlimited Edition V8.1 DB2 Universal Developer's Edition V8.1 (one user only)	Updated to current maintenance level DB2 Workgroup Server Unlimited Edition V8.2 DB2 Universal Developer's Edition V8.2 (one user only)

For additional information, also refer to the **Technical information** section and to:

- Software Announcement 204-054, dated March 30, 2004, (Data Management Gold Bundle updates)
- Software Announcement 204-064, dated April 13, 2004, (Red Brick V6.30 and Red Brick Gold Program Bundles)
- Software Announcement 204-166, dated July 27, 2004, (Informix XPS V8.50)
- Software Announcement 204-185, dated August 17, 2004, (DB2 Universal Database® for Linux, UNIX, and Windows, V8.2)
- Software Announcement 204-202, dated September 14, 2004, (DB2 Information Integrator for Linux, UNIX, and Windows, V8.2)

Section 508 of the U.S. Rehabilitation Act

The products addressed in this announcement are capable as of March 16, 2006, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A U.S. Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via IBM's Web site

http://www-3.ibm.com/table/product_accessibility/index.html

Availability of national languages

Product description	Language	GA date
IDS Express Edition V10.0 DB2 Business Intelligence Bundle V8.2.0	English U.S. Multilingual (French, Danish, Russian, Spanish, Norwegian Bokmal, Portuguese-Brazilian, German, Swedish, English U.S., Italian, Finnish, Polish), English U.S.	May 20, 2005 March 16, 2006

Specified operating environment

Hardware requirements

For a listing of hardware requirements, refer to:

- Software Announcement 204-054, dated March 30, 2004, (Data Management Gold Bundle updates for Business Intelligence and Red Brick™)

- Software Announcement 204-064, dated April 13, 2004, (Red Brick V6.30 and Red Brick Gold Program bundles)
- Software Announcement 204-166, dated July 27, 2004, (Informix XPS V8.50)
- Software Announcement 204-185, dated August 17, 2004, (DB2® Universal Database for Linux™, UNIX®, and Windows™, V8.2)
- Software Announcement 204-202, dated September 14, 2004, (DB2 Information Integrator for Linux, UNIX, and Windows, V8.2)
- Software Announcement 205-105, dated April 26, 2005, (Informix Dynamic Server Express Edition V10.0)

Software requirements

For a listing of software requirements, refer to:

- Software Announcement 204-054, dated March 30, 2004, (Data Management Gold bundle updates for Business Intelligence and Red Brick)
- Software Announcement 204-064, dated April 13, 2004, (Red Brick V6.30 and Red Brick Gold Program bundles)
- Software Announcement 204-166, dated July 27, 2004, (Informix XPS V8.50) — refer to note below
- Software Announcement 204-185, dated August 17, 2004, (DB2 Universal Database® for Linux, UNIX, and Windows, V8.2)
- Software Announcement 204-202, dated September 14, 2004, (DB2 Information Integrator for Linux, UNIX, and Windows, V8.2)
- Software Announcement 205-105, dated April 26, 2005, (Informix Dynamic Server Express Edition V10.0)

Note: The Compaq Tru64 platform is not supported in XPS V8.51.

Planning information

Software Maintenance, previously referred to as Software Subscription and Technical Support, is included in the Passport Advantage Agreement. Installation and technical support is provided by the Software Maintenance offering of the IBM International Passport Advantage Agreement. This fee service enhances customer productivity, with voice and electronic access into IBM support organizations.

Packaging

IDS Express Edition V10.0 is distributed with:

- International Program License Agreement (Z125-3301)

This announcement is provided for your information only. For additional information, contact your IBM representative, call 800-IBM-4YOU, or visit the IBM home page at: <http://www.ibm.com>.

- License Information document
- Windows 2000, Windows XP, Windows Server 2003 32-bit CD
- Linux for xSeries® RHEL 3,4 SUSE SLES 9 32-bit CD
- Refer to the **Publications** section of this document.

Complementary products and additional media include:

- Server Studio Java™ Edition by AGS LTD CD
- IDS Translated Documentation CD
- Informix Spatial DataBlade™ v8.20 CD
- Informix Spatial DataBlade Data Disk CDs
- Informix International Language Supplement CD

Data Management Gold Program Business Intelligence Bundle

The **XPS V8.51** release is distributed with:

- International Program License Agreement (Z125-3301)
- License Information document
- XPS AIX® 64-bit CD
- XPS HP-UX 64-bit CD
- XPS SUN 64-bit CD
- XPS Hp Itanium 64-bit CD
- PDF documentation CD

IBM DB2 Universal Developer's Edition (1 user only) V8.2

Charge metrics definitions

Processor

In Full Capacity charging, PoEs must be acquired for all activated “processors” (available for use) that are on the server where the program or a component of the program is run.

1. If there are program components included in the offering whose function is not to be included in the

- charge metric, these must be listed in the program-unique Terms of the License Information.
2. IBM defines a physical processor in a computer as a functional unit that interprets and executes instructions. A physical processor consists of at least an instruction control unit and one or more arithmetic and logic units.
3. Multi-core technology allows two or more processors (commonly called “cores”) to be active on a single silicon chip. Unless otherwise announced, with multi-core technology, IBM considers each “core” to be a physical processor. For example, in a dual-core chip, there are two physical processors residing on the single silicon chip.
4. In the zSeries’ Integrated Facility for Linux (IFL) environment, each IFL engine is considered a single “physical processor.”
5. Threading, a technique which makes a single processor seem to perform as two or more, does **not** affect the count of physical processors.
6. Where “blade” technology is employed, each “blade” is considered a separate server and charging is based upon the total number of processors on the blade on which the program is run.

“per Server”

Any machine on which a program or a component of a program is run. A Proof of Entitlement (PoE) is evidence of your authorization to use a program and is required for each Server on which the program is run.

1. Programs are “installed” onto a storage device which may or may not be part of the Server, thus, “run” is important here as the program may be stored on a CD, Storage Area Network (SAN), available via SCSI, and so on.
2. The number of partitions or processors on the Server is irrelevant.
3. Where “blade” technology is employed, each “blade” is considered a separate Server.

Authorized user

An authorized user (user) is one and only one individual, machine, program, or device with a specific identity (ID) within or outside your enterprise.

A PoE is evidence of your authorization to use a program and is required for each User accessing the program or any component, application, feature, function, and/or capability thereof, either directly or indirectly, through any means on behalf of the user in any manner.

The program may be installed on one or more computers, and accessed by multiple users provided that a user authorization has been obtained for each individual user.

1. Users have unique specific identity and IDs cannot be shared.
2. An ID may establish one or more connections and count as a single user.
3. An ID may only be reassigned for the long-term replacement of personnel, machine, program, or device.

IBM Informix Dynamic Server Express Edition Unlimited

IDS Express Edition Unlimited Proc Day OOCOD Temp Use Chrg	D550DLL
--	---------

Terms and conditions

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Licensing: IBM International Program License Agreement. Proofs of Entitlement (PoE) are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Maintenance, previously referred to as Software Subscription and Technical Support.

License information form numbers

Program name	Program number	Form number
DB2 Business Intelligence	5724-E17	CT3MEML
Gold Analytic Bundle Enterprise	5724-E20	CT3MFML
Gold Analytic Bundle SMB	5724-E21	CT3MGML
Informix Dynamic Server (IDS)	5724-L23	L-KMOE-6E7RM
Informix Extended Parallel Server (XPS)	5724-C19	CT3TZML

On or near the planned availability date, the License Information will be available for review on the IBM Software License Agreement Web site

<http://www.ibm.com/software/sla/slabd.nsf>

Limited warranty: Yes

Warranty: This program includes a warranty for one year from acquisition from IBM or an authorized IBM Business Partner. For one year from acquisition of the program, this warranty provides the customer with access to databases containing program information and FAQs, including any known fixes to defects, which the customer can download or otherwise obtain and install.

Program technical support: Technical support of a program product will be available for a minimum of three years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates, releases, and versions of the program. Customers will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee: If for any reason you are dissatisfied with the program and you are the original licensee, return it within 30 days from the invoice date, to the party (either IBM or its reseller) from whom you acquired it, for a refund.

- For programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program.
- For programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by the customer.

Copy and use on home/portable computer: No

Volume orders (IVO): No

Passport Advantage applies: Yes, and through the Passport Advantage Web site

<http://www.ibm.com/software/passportadvantage>

Usage restriction: Yes

Level of use

Your use of the program may not exceed the level defined by the number of use authorizations you have acquired.

IDS Express Edition V10.0 is available in two metrics:

- Processor —IDS Express Edition Unlimited
- Server + Authorized User —IDS Express Edition V10.0

XPS is licensed on a per processor metric.

Data Management Gold Program Red Brick Analytic Bundle for Enterprises and Data Management Gold Program Red Brick for SMB are licensed on a processor metric.

Refer to the **Charge metrics definition** section for additional details.

IBM Data Management Gold Program Red Brick Analytic Bundle for SMB V8.2 and IBM Data Management Gold Program Red Brick Analytic Bundle for Enterprises V8.2

When you purchase a single license (right to copy), you are authorized to install either Red Brick products or DB2 products, but not both. If you purchase multiple licenses, you may install all Red Brick products, all DB2 products, or a combination of both, up to a maximum of the number of licenses acquired. For example, if you purchase 10 licenses, you may install 10 copies of Red Brick, 10 copies of DB2, or five copies each of Red Brick and DB2.

If you purchase the DB2 media pack, all of the products listed in the offering will be shipped. If you purchase the Red Brick media pack, you will be contacted and the appropriate software version, platform, and language pack will be shipped.

- DB2 products are subject to the terms and conditions of the IBM license agreement shipped with DB2 products, as well as these additional terms.
- Red Brick products are subject to the terms and conditions of the Red Brick license agreement shipped with Red Brick products, as well as these additional terms.

Additional terms

Use of the product is subject to the terms and conditions of the products installed, except:

- DB2 Universal Developer's Edition, which allows up to five individual users per server where the Data Management Gold Red Brick Analytic Bundle for Enterprises is installed. The SMB version of this bundle is limited to one user per server.
- DB2 Relational Connect, which allows connection to Informix data sources only.

By using, installing, or starting a product, you agree to the applicable terms and conditions for that product, as well as these additional terms.

The limited use only copy of IBM DB2 Information Integrator Standard Edition that is provided with this offering can only be used in conjunction with IBM Red Brick databases to provide access to data held in IBM DB2 Universal Databases, other IBM Red Brick

databases, or IBM Informix Extended Parallel Server databases.

Each DB2 Information Integrator Standard Edition Proof of Entitlement (PoE) includes five DB2 Information Integrator Connector PoEs for accessing ODBC sources. Each Connector PoE entitles you to access a single database instance of a Red Brick database or data warehouse, where a "database instance" is a single copy of all the data in the database, or data warehouse, with a catalog to support it. Access to additional database instances or types will require that you purchase a DB2 Information Integrator PoE equal to the number of processors attached to DB2 Information Integrator, and additional DB2 Information Integrator Connector PoEs.

Third-party code

The program contains (and future updates and fix packs to the program may also contain) certain third-party components, which are provided to you under terms and conditions that are different from this agreement, or that required IBM to provide you with certain notices and/or information. For such third-party components, IBM will either identify the third-party components in the program's "README" file (or in an updated "README" file accompanying a fix pack or update), or in a file or files referenced in such "README" files (and shall include any associated license agreement, notices and other related information therein), or the third-party component will contain, or be accompanied by its own license agreement (for example, provided when installing or starting such component, or accompanying such component in a file entitled "README," "COPYING," "LICENSE," or a substantially similar title, or included among the program's paper documentation, if any). Your use of each third-party component that contains, or is accompanied by its own license agreement, or for which IBM has identified a license agreement in one of the above "README" files (or in a file or files referenced therein), will be subject to the terms and conditions of such other license agreements, and not this agreement. By using and not uninstalling such third-party components after the initial installation of such third party components (thereby giving you access to the applicable license agreements, notices, and information), you acknowledge and agree to all such license agreements, notices, and information, including those provided only in the English language. You agree to review any updated "README" file, which accompanies updates or fix packs to the program.

Excluded components

Notwithstanding the terms and conditions of any other agreement you may have with IBM, any of its related or affiliated companies (collectively "IBM"), or with any of the third parties that provide IBM products (Third Parties), the following terms and conditions apply to all "excluded components" identified below: (a) all excluded components are provided on an "as is" basis; (b) **IBM and Third Parties disclaim any and all express and implied warranties and conditions including, but not limited to, the warranty of non-infringement or interference and the implied warranties and conditions of merchantability and fitness for a particular purpose;** (c) IBM and Third Parties will not be liable to you or indemnify you for any claims related to the excluded components; and (d) IBM and Third Parties will not be liable for any direct, indirect, incidental, special, exemplary, punitive or consequential damages with respect to the excluded components.

The following are excluded components:

- quicksort
- op
- XML4C 5.0

- Microsoft™ Visual C++
- Microsoft Visual J++ Libraries

Software maintenance applies: Yes

Software Maintenance, previously referred to as Software Subscription and Technical Support, is included in the IBM International Passport Advantage Agreement. Installation and technical support is provided by the Software Maintenance offering of the IBM International Passport Advantage Agreement. This fee service provides voice and electronic access to IBM support organizations.

IBM includes one year of Software Maintenance with the initial license acquisition of each program acquired. The initial period of Software Maintenance can be extended by the purchase of a renewal option, if available.

While your Software Maintenance is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, every day of the year. For additional details, consult your *IBM Software Support Guide* at

<http://techsupport.services.ibm.com/guides/handbook.html>

Software Maintenance does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under this agreement.

For more information about the Passport Advantage Agreement, visit the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

Complimentary products: IBM provides licensed copies of complimentary products in our product boxes. The complimentary products are not upgradeable through the originally ordered product. They are only upgradeable separately as individual products. If a fully licensed product is required, contact IBM or your reseller. In addition, complimentary products do not entitle customers to receive service support.

iSeries™ Software Maintenance applies: No

Educational allowance available: Not applicable.

On/Off capacity on demand

To be eligible for On/Off Capacity on Demand pricing, customers must be enabled for temporary capacity on the corresponding hardware, and the required contract — Z125-6907, *Amendment for iSeries and pSeries® Temporary Capacity On Demand — Software* — must be signed prior to use.

IBM Electronic Services

IBM Global Services has transformed its delivery of hardware and software support services to put you on the road to higher systems availability. IBM Electronic Services is a Web-enabled solution that provides you with an exclusive, no-additional-charge enhancement to the

service and support available on the IBM @server® platform. These services provide the opportunity for greater system availability due to faster problem resolution and preemptive monitoring. IBM Electronic Services is comprised of two separate but complementary elements: IBM Electronic Services news page and IBM Electronic Service Agent™.

IBM Electronic Services news page provides you with a single Internet entry point that replaces the multiple entry points traditionally used by customers to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The IBM Electronic Service Agent is no-additional-charge software that resides on your IBM @server® system. It is designed to proactively monitor events and transmit system inventory information to IBM on a periodic, customer-defined timetable. The IBM Electronic Service Agent tracks system inventory, hardware error logs, and performance information. If the server is under a current IBM maintenance service agreement or within the IBM warranty period, the Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to provide proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent will be made available to IBM service support representatives when they are helping answer your questions or diagnosing problems.

To learn how IBM Electronic Services can work for you, visit

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States and other IBM subsidiaries and divisions worldwide to qualified

commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Order now

To order, contact the Americas Call Centers, your local IBM representative, or your IBM Business Partner.

To identify your local IBM representative or IBM Business Partner, call 800-IBM-4YOU (426-4968).

Phone: 800-IBM-CALL (426-2255)
Fax: 800-2IBM-FAX (242-6329)
